Choose the cleanest cabin air with new VOZC technology from Metivo

Airbus recommends airlines to select next-generation VOZC converters on A320 family aircraft

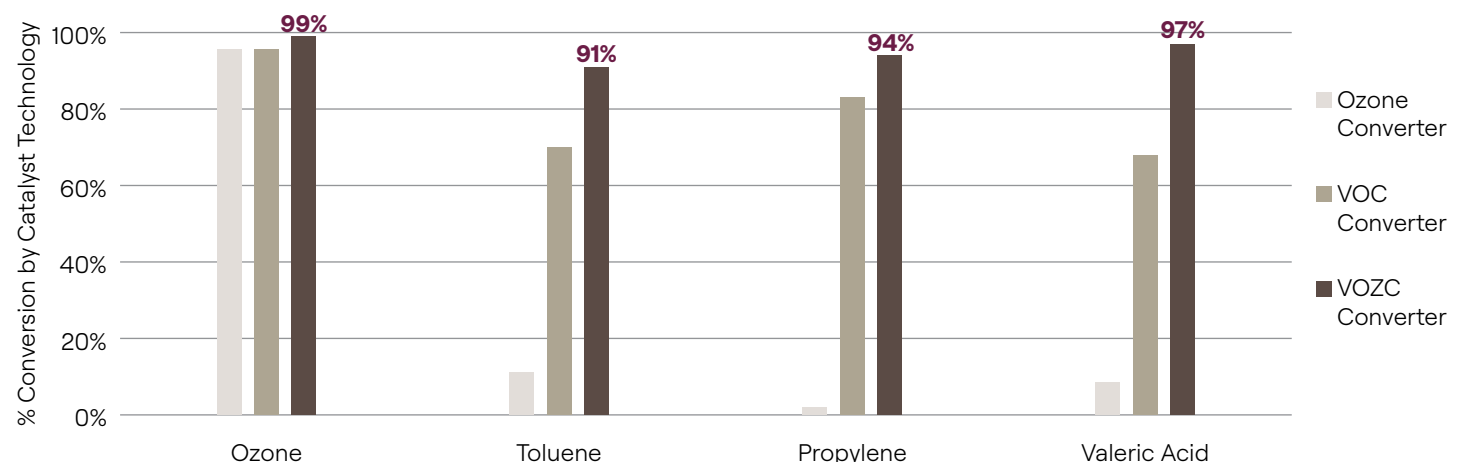

<https://metivo.com/en/catalysts/aerospace/vozc>

Airlines are increasingly facing higher maintenance costs, flight delays and potential diversions due to cabin odor issues and fume events. Why? Because oil and hydraulic fluid originating from the engine and auxiliary power units enter the bleed air stream, ultimately reaching the cabin and can be detected even at the smallest levels. Frequent no-fault-found (NFF) occurrences can trigger repeated maintenance and increase the risk of future delays or diversions. These events cost airlines money, inconvenience their customers, and tarnish their image. Our new VOZC offering provides a sustainable and cost-effective way for airlines to mitigate these issues.

Metivo™, Part of BASF Group, is the innovative leader in catalytic cabin air quality solutions and is indispensable to the industry's pursuit of enhancing the overall air travel experience for passengers and crew. Our catalyst solutions effectively eliminate odors, ozone, and engine smells, improving crew and passenger comfort and safety while reducing flight disruptions.

We care about your plane's air quality, so you don't need to.

Metivo™, Part of BASF Group, VOCZ Outperforms All Known Aviation Catalyst Technologies

Your Benefits with VOZC Converters

- VOZC converters **reduce odor-causing hydrocarbons** while **improving the necessary compliant ozone** conversion function of standard Ozone-only or Ozone-VOC converters.
- Improve aircraft **operational reliability** and **passenger/flight crew comfort** by mitigating odors entering the cabin.
- VOZC technology offers a step-change improvement across a wide array of VOCs, **removing 97 percent of the most unpleasant odor-causing VOCs** (valeric acid) in the bleed air entering the cabin.
- VOZC converters are proven to **reduce no fault found maintenance by 65 percent**.
- Operators can avoid odor-related event costs, which can average more than \$200,000 to \$300,000.
- **Feel confident** that Metivo's converters have been used on commercial aircraft for over 40 years.
- Reliable partner supplying **quality products and services**, on time, that enable our customers to keep their commitments for a **safe aero-space**.

Make VOZC the Standard Across Your Fleet

Select VOZC at Line Fit

Specify VOZC for new A320s at line fit with Airbus.

New VOZC Part Number = 50100001

Purchase VOZC Spares

Add to your inventory today with VOZC spares from our aftermarket distributors.

New VOZC Part Number = 50100001

UpCore™ Current Units

Identify your current units and prioritize the change with UpCore. Receive your same unit back with a factory new reset, new part number, and full 48-month OEM warranty.

Eligible Units for

UpCore = 20499006 and 44018005

UpCore Part Number = 50100002
